```
1 {
2   "message": "Student already exists."
3 }
```

if suppose student trying to do signup again with same id, email, phone, system not allowing to signup.

And user got message from server "Student already exists."

Visual Studio Code interface showing a Node.js project named "student.js - Nodejs-Assigning-Mentor-and-Students-with-Database". The Explorer sidebar on the left shows the file structure, including a "routes" folder containing "student.js".

The main editor displays the code for "student.js", specifically the `router.post('/signup')` endpoint. The code uses `async(req, res) => {` and `try {` blocks to handle the signup request. It logs the request body and checks for existing students using `StudentModel.findOne()` with criteria for `studentId`, `studentEmail`, and `studentPhone`.

The TERMINAL pane at the bottom shows the output of the application. It displays the timing and course information, followed by a message: "Login request received, please wait we are validating...". The terminal then shows the successful signup of a student with the following details:

```
signup {
  studentId: 1,
  studentName: 'Alex',
  studentEmail: 'alex@gmail.com',
  studentPhone: 7779089023,
  batch: 'B51 WD1 ENGLISH',
  timing: '8:00 AM to 10:00 AM',
  course: 'Full stack development'
}
```

Below the successful signup, the terminal shows repeated messages indicating that the student ID, email, and phone number are already used, suggesting a validation check is in place to prevent duplicate signups.

Handwritten orange text annotations provide context:

- A yellow checkmark is placed next to the successful signup output.
- The text "student signup successfull and data stored in db" is written in orange.
- The text "if suppose another student are same student trying to signup again with same id, email, phone systme not allow to signup." is written in orange.

The status bar at the bottom indicates the current file is "Ln 34, Col 24", the encoding is "UTF-8", and the line endings are "CRLF". The system tray shows the date and time as "18:24 05-02-2024" and the weather as "31°C Partly sunny".
